review

review-<id>.json
machine-readable artifact

review-<id>.md
human-readable report

index.jsonl
append-only index

staged diff
diff_hash bound

Four states kept separate (never merged into “a pass”)

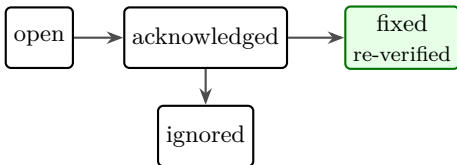

Execution state
completed / failed / cancelled

Verification outcome
no sufficiently supported findings
≠ pass

Disposition state
fixed (re-verified) / disputed /
accepted risk

User decision
merge / rework / reject
— made by a human, never auto-generated

Finding disposition state machine

Original findings are never silently deleted;
fixes must link a follow-up re-review.
